

PanelBuilder32 Programming

September 2025

Course Overview

After completing this course, students will develop the skills needed to configure, and program a PanelView 600 using PanelBuilder32. **The course is done on equipment made available by the client.**

Course Objective

To provide the necessary information, resources, and hands-on activities needed to become proficient in programming the PanelView 600. The course focuses on hardware & Network configurations, and programming to either a PLC-5 or ControlLogix system. There are ample hands-on exercises and troubleshooting that familiarize the student with the hardware and software.

Who Should Attend

This course is recommended for maintenance and engineering personnel, as well as those responsible for programming and maintaining this equipment. It is highly recommended that students have a thorough understanding of the concepts and practices included in the **ControlLogix Programming & Maintenance course (POCC101)**.

Course Length and Cost

Per Student Cost:	\$1350 USD
Course Length:	3 Days

Client Expectations

This training is provided at a discount by using equipment provided by the client. Students are expected to attend the entire training session to receive their certificate. It includes a separate

workstation, DH/DH+ Communications Module, ControlNet Module, Ethernet Module, 1756-L75 Controller, and software for each student. An additional station for the instructor. In addition, make the following available:

- Computer and necessary software, including: RSLogix 5000, RSLogix 5, RSLogix 500, RSLinx, ControlFlash, RSNetWorx, PanelBuilder32 software.
- PanelView 600 or equivalent
- Internet Access
- Dry-erase board for examples, assignments, etc.

Provider Expectations

The contractor will provide the following:

- Student Workbook with exercises
- RSLogix 5000 Instruction Set Reference (Digital)
- RSLogix 5 Instruction Set Reference (Digital)
- PanelView 600 Manual (Digital)
- Select Procedure Guides
- Lab results can be provided if desired
- Certificate of Completion or Achievement
 - A completion certificate is provided to students who complete the entire class, but with no assessment
 - An achievement certificate is provided for those who complete the entire class and pass a written and programming assessment

Course Agenda

Day 1:

- Safety
- Hardware Familiarization
- Configuration Screen
- Determining Communications Method
- Communicating to ControlLogix
- pba vs. pva programs

- PanelBuilder32 Software
- Tags
- Objects
- Scheduling ControlNet
- Screen Properties
- Adding a Configuration Button to a Screen
- Adding Text to a Screen
- Adding the Date and Time to a Screen
- Adding a screen selection button
- Programming between the PanelView and ControlLogix
- Add A Pushbutton to a Screen

Day 2

- Adding Tags
- Downloading to the PanelView 600
- Integrated Programming Exercises
- Creating a Washing Machine Program
- Importing Excel Tags to the PanelView
- Exporting Tags from ControlLogix
- Editing Tags in Excel

Day 3

- Creating Screens
- Creating Messages
- Creating an Alarm Screen
- Create a Maintenance Screen
- Program Function Keys when applicable
- Assessment

Adjustments

It may be necessary to adjust the course curriculum depending on the students' understanding of the material. Every effort will be made to include as much information as possible.

Time permitting, troubleshooting will be incorporated into the program. Troubleshooting will be limited to software, edits, and hardware configurations unless the client provides faulty equipment to be used.

If you have questions about any part of the course or would like to modify the course curriculum, please reach out to [PO Controls](#) to discuss. Price may vary depending on the extent of changes.
